

CB-42 Status Update

On November 4, 2019, the Howard County Council passed CB-42, which adjusts the school surcharge applied to new development to fund the impacts of increased enrollment capacity needs.

Thank you to all PTA families that have advocated toward educational improvements. We extend thanks to the state delegation and council members who made this possible.

PTACHC delegates and presidents who watched the proceedings live with the state delegation during the PTA Council meeting, recognize this as an incremental improvement and look forward to working with legislators on additional refinements to ensure the best educational experience for our children.
